Title of Change: Turnover of XRP v3.1 (patch 1) to SMC for distribution to all sites

28. Description of Change:

XRP-II's Site-Host Map report format has been expanded to accommodate VATC, VATC (SMC), mini-DAAC, and mini-DAAC (SMC) data, and formatting revisions have been included in XRP-II's Hardware-Software Map, Indented Bill of Materials, and Baselined Documents reports. Also, a problem precluding creation of EIN item interrelationships has been fixed. Some of these changes were slated for delivery as part of Drop 5A, but they are wanted by the baseline data deployment team now.

31. Consequences if Changes are not Approved:

NCR ECSed17243: One of two indented bill of material reports cannot be used since it prints more lines than fit on a page.

NCR ECSed17479: Document numbers used for identifying baseline reports posted to the Web would be labelled as "Notes" in published reports.

NCR ECSed17212: No significant consequence anticipated.

NCR ECSed18061: Data that associates inventory items with one another cannot be displayed.

NCR ECSed19680: Cannot use the database backup capability provided by XRP's underlying DBMS, Unify.

NCR ECSed19681: XRP will not call the right file to backup the XRP database.

32. This patch should be used for Acceptance testing in lieu of the version initially delivered for 4PL.
